**INFORMATION DISCLOSURE STATEMENT**

Sir:

This invention relates to a tank for containing compressed air for supplying the air to one or more pneumatically-operated components, devices, or systems of a heavy-duty vehicle such as a tractor-trailer or straight truck, also serves as part of the structure of the frame or subframe of the vehicle. The frame or subframe includes a pair of spaced-apart, parallel, elongated and longitudinally extending main members. One or more of the tanks serve as interconnecting cross members of the frame or subframe structure. Each tank/cross member generally extends between and is perpendicular to the main members and is secured to the main members and/or suspension hangers to form a rigid, integrated frame or subframe structure having reduced weight, yet which is capable of reacting the loads placed on the structure during operation of the vehicle.

As authorized and encouraged under 37 C.F.R. §1.197-1.99, Applicants hereby cite as a means of complying with the duty of disclosure set forth in 37 C.F.R. §1.56, the following patents and/or documents, copies enclosed, which the Examiner should consider with respect to the above-identified United States Patent Application.
